# ANNUAL REPORT

OF THE

ORDINARY MANAGERS

OF THE

ROYAL EDINBURGH ASYLUM FOR THE INSANE

FOR THE YEAR ENDING 31ST DECEMBER 1895.

---

*Presented to the Statutory Meeting of the Corporation held within the City Chambers, Edinburgh, on 24th February 1896.*

---

THE past year is in some respects the most eventful which has occurred in the history of the Royal Edinburgh Asylum. In the Report for the year 1894 the Managers recorded the opening ceremony of the New Asylum at Craig House, which took place on the 26th of October of that year, under the presidency of His Grace the Duke of Buccleuch and Queensberry, as Governor of the Corporation. Although New Craig House was then formally opened, it was not until the 20th of March 1895 that a commencement was made in the important work of transferring the patients from the old East House Asylum to the main building of New Craig House. The transfer was completed on the 21st of May 1895, when the last patient was removed from the old building, for upwards of eighty years the home of persons suffering under mental disease.

The Managers have satisfaction in recording that the transference of the patients from their old quarters to their newer and brigher home was effected without a single misadventure, thanks

to the skilful arrangements, prudent forethought, and ceaseless care of the Physician-Superintendent, supported by his staff.

It is with no small pleasure that the Managers are able to state that the New Asylum in all respects fulfils the high expectations which had been formed of it, all the wants and requirements of the inmates having been provided for in a manner which reflects the highest credit upon Dr Clouston, the Physician-Superintendent, and Mr Sydney Mitchell, the Architect. It is also right to state that the main building and the adjoining villas have all the appearance of being very well built as regards both material and workmanship; the Contractor for the mason work and the joiner work was Mr John Lownie, the plaster work being executed by Mr W. Baird, the slater work by Messrs W. Highet & Son, and the plumber work by Mr James Macdonald. The installation of the electric light was supplied by Messrs Ernest Scott & Mountain, of Newcastle, under the directions of Mr W. Bryson, Electric Engineer, Glasgow, and the work appears to have been well done, although both the preliminary outlay and the working expenses are greatly in excess of what the Managers expected.

The Managers are glad to be able to report that the advantages of the New Asylum have been amply recognised by the Medical Profession and the public at large, the applications for admission on behalf of new patients having during the year amounted to eighty, or about twice the annual average.

The following Table shows the daily average number of patients under treatment in all the different departments of the Asylum, during the year 1895, contrasted with the numbers during the year 1894 :—

	1894.	1895.	Increase.	Decrease.
1. Patients in East House, Craig House, and Myreside . . . .	155	170	15	—
2. Intermediate patients, West House, . . . . .	145	136	—	9
3. Private patients at lowest rate of board, . . . . .	61	73	12	—
Carry forward, . . . . .	361	379	27	9

	1894.	1895.	Increase.	Decrease.
Brought forward, .	361	379	27	9
4. Patients whose boards are defrayed by parochial authorities, . . . . .	500	503	3	—
	861	882	30	9
	—	861	9	—
Increased daily average number of patients in all departments of the Institution during the year 1895, . . . . .	—	21	21	—

From the above statement it will be observed that the daily average number of patients paying high rates of board has increased by fifteen. This increase, however, did not begin until the transfer of the New Asylum. It has been progressive ever since, the number of high-class patients actually accommodated having increased from 156 on 1st January 1895 to 186 on 1st January 1896, while the *cumulo* amount of boards payable for these patients has advanced from £18,587 to £24,061, being an increase of £5474. The boards actually received for such patients during the year amounted to £20,887, 5s. 10d. against £18,587, 16s. for the year 1894, being an advance of £2299, 9s. 10d. Owing to the circumstance that it was not until near the close of the year that the full benefit was derived from the increased income, while during the whole year the Managers had to meet the increased cost of carrying on the New Asylum, including therein the whole annual interest upon the Craig House debt, they were quite prepared for a considerable deficit on the Craig House Account for the year.

The account of the Treasurer's intromissions is herewith submitted.

The Ordinary Revenue from all sources during the past year was . . . . .	L.47,634 15 10
Carry forward, . . . . .	L.47,634 15 10

Brought forward, . . .	L.47,634	15	10
The Ordinary Expenditure, including Obligatory Instalment of L.1526, 2s. 2d towards liquidation of the West House debt, and also including the interest due on Craig House debt of L.86,271, 12s. 10d., was .	47,872	4	3
Leaving a deficit for the year of .	<u>L.237</u>	<u>8</u>	<u>5</u>

The above deficit arises thus—

Excess of Expenditure over Income in connection with East House and Craig House, .	L.900	18	8
<i>Deduct</i> —Surplus Revenue on Boards of intermediate patients in West House, .	L.340	15	3
Do. on do. of patients at lowest rate of Board in West House, . . .	322	15	0
	<u>663</u>	<u>10</u>	<u>3</u>
Nett deficit, as before, . . .	<u>L.237</u>	<u>8</u>	<u>5</u>

The Managers may point out that had they throughout the whole year been in receipt of boards for high-class patients such as were payable at the close of the year, viz., L.24,061, instead of there being a deficit of L.900 on Craig House, there would have been a surplus exceeding that amount, a result which they anticipate with confidence for the current year.

The above surplus derived from intermediate patients (L.340, 15s. 3d.) will be set against the deficit on Craig House. The surplus of L.322, 15s. derived from the pauper patients is carried to the credit of the Sinking Fund for liquidating the debt on the West House.

As will appear from the Treasurer's Accounts, the cost of maintainance of intermediate patients during the year was L.39, 12s. 2½d. The board presently charged for these patients is L.42, and the Managers do not propose to make any change in this rate, which allows of only L.2, 7s. 9½d. to cover one year's house accommodation of a very superior character.

The cost of maintaining each patient whose board is paid by the Parochial Authorities was L.29, 14s. 0 $\frac{3}{4}$ d., being only 5s. 11 $\frac{1}{4}$ d. below the rate of board, L.30, charged for them, and which the Managers propose to continue at the same figure for the current year.

In the Report for the year ending 31st December 1894 it was stated that the expenditure upon New Craig House amounted to . . . . . L.111,251 6 4

There has been expended during the year 1895

a further sum of . . . . . 19,731 9 5

Making the total expenditure on Craig House

to 31st December 1895, . . . . L.131,082 15 9

Of this sum there has been defrayed out of the Surplus Receipts accumulated since 31st December 1884, and from other funds at the disposal of the Managers, including L.7100 received to account of price of East House, the sum of L.44,811 2 11

And there has been borrowed

the sum of . . . . . 86,271 12 10

----- L.131,082 15 9

The debt upon the West House has, through the operation of the Sinking Fund, been reduced to £30,860, 8s. 6d.

As soon as the East House was vacated, steps were taken to dispose of it, along with the adjoining ground, extending to about seven acres of land, and the Managers are glad to be able to report that after due advertisement they succeeded in selling the whole property in lots for prices together amounting to £14,850, which is about as much as the Managers were led to expect. As will be seen from the Treasurer's Accounts, £7100 has already been received to account of the price, the balance being due at an early date. In consequence of certain restrictions against building, affecting part of the subjects sold, the Managers entered into an agreement with the Superiors of the ground, under which the latter will be entitled to a sum estimated at £1000 for a modification of these restrictions.

The Accounts of the Contractors for the erection of New Craig House have not yet been finally adjusted, but it is believed that these will be more than covered by the balance of the price of the East House.

During the past year Dr Clouston has repeatedly brought under the notice of the Board the difficulty of finding room in the West House for the increasing number of pauper patients sent to the Asylum by the City Parish Council under the contracts entered into with the City, St. Cuthbert's, and Canongate Parishes in the year 1844. The West House was at that time in process of erection, and the Managers of the Corporation for the time being, in consideration of a sum of £3210 paid to them by the Parochial Boards of these Parishes, agreed to receive into the Asylum all their insane pauper patients, whatever their number might be, in all time coming. It was then estimated that 105 patients was the highest number for which accommodation would be required, while the average number from these Parishes under treatment in the Asylum during the year 1895 was about 360. The Managers having brought the hardship of their case before the City Parish Council with a view to obtaining a modification of the original contracts, they are glad to be able to report that the Parish Council have received their representations in a friendly spirit, and a series of propositions are now before the Council with a view to restricting the number of pauper patients to be accommodated in future.

During the year 1895 the Asylum was inspected by Dr Sibbald, one of Her Majesty's Commissioners in Lunacy, on the 5th, 6th, and 7th of February, and by Dr Fraser, another of the Commissioners, on the 9th, 10th, and 11th of October. With reference to the removal of the patients from the old to the New Asylum, Dr Sibbald in his Report writes as follows:—"The transference  
 "of patients from the East House to New Craig House is to  
 "begin immediately, and it is thus probable that before long the  
 "building, a part of which was the original Edinburgh Lunatic  
 "Asylum, will be left dismantled and disused. This building re-  
 "ceived its first patient on the 19th of July 1813 ; and there may  
 "still be traced in its construction and arrangements many of the  
 "phases through which the treatment of the insane has passed

“in its progress from the coercive and mistaken methods practised at the period of its foundation to the mild and more efficient methods of the present day. One feels a touch of regret at parting with a fabric round which has gathered so much that is interesting in the history of the treatment of insanity. But this feeling must give place to the gratification which a visit to the establishment at New Craig House produces. The provision which is made there for the comfort and curative treatment of the patients is of the highest excellence, and far transcends anything that the benevolent founders of the Asylum eighty years ago could have imagined. When the Asylum is next visited the buildings may be expected to be occupied and the new arrangements in full operation.”

Dr Fraser's report contains the following remarks :—“ An important event in the history of the Institution has taken place since last visit in the completion and occupation of Craig House. The lady patients were transferred to it on the 20th March 1895, and the gentlemen on the 20th May. Externally this building is imposing and attractive, and internally it may be said to be a masterpiece in design as an Asylum for the upper and middle classes. All its arrangements have been planned with great care and ability, and it is pleasing to observe how every detail has been designed with a view to the efficient care of the inmates and the successful administration of the Institution. To the south of the central hall, which is large, lofty, and richly decorated, are the drawing-room and billiard-room, and to the north are the five dining-rooms. The buildings, which run east and west, and have wings to the south, consist of three storeys ; the first and second contain four wards, and the third consists of bedrooms. To the west of Craig House are the hospital for gentlemen, and a villa called Queen's Craig. These are connected so as to have billiard and other rooms in common. To the east is the hospital for ladies. The whole of the buildings are lighted with the electric light. The heating arrangements consist of open fires and hot water pipes. The sanitary arrangements are of the most recent and efficient kind. The furniture and furnishings throughout all these buildings are handsome and elegant, and the decoration is

“rich and in excellent taste. Nothing has been left undone  
 “which would secure the comfort, safety, and well-being of the  
 “patients. Such pleasant and cheerful surroundings as exist in  
 “Craig House and the adjacent villas cannot fail to have a most  
 “beneficial influence on the mental and bodily condition of the  
 “patients, and to make their life as happy as it is possible to be  
 “during their mental illness. The prediction made in a former  
 “entry, that when Craig House and the adjacent villas were com-  
 “pleted Scotland would possess an Asylum for high-class patients  
 “which would not have its equal anywhere, has, it will readily  
 “be acknowledged, been fulfilled.”

In regard to the individual patients Dr Fraser records:—“The  
 “wards in every section of the Asylum were found in excellent  
 “order, scrupulously clean, and well ventilated, and the condi-  
 “tion of the patients was most satisfactory. The case of each  
 “patient is made a matter of special study, and the case-books  
 “show that everything is done which medical science indicates  
 “in order to promote recovery. The nursing of the sick and in-  
 “firm in the hospital sections is of a high standard of efficiency.  
 “The patients generally bore every evidence of being well cared  
 “for, and no efforts are spared to secure that they should be  
 “kindly and considerately treated. Their food, exercise, and  
 “occupation receive every attention. The efficient condition of  
 “the Institution shows that it is managed by Dr Clouston with  
 “great energy and ability. It is understood, with satisfaction,  
 “that the increase in the revenue of the Institution indicates  
 “financial prosperity.”

The Managers are sorry that the Institution will now be de-  
 prived of the advice and assistance of Mr John Ritchie Findlay  
 and Mr Alexander Duncan Campbell, who retire from the Board  
 by rotation.

They beg leave to recommend as Mr Findlay's successor Mr  
 James Howden, C.A., who has already proved himself a most  
 efficient member of the Board.

Mr Campbell is one of the two Delegates from the City Parish  
 Council under the contract entered into in 1844 between the  
 Town Council of Edinburgh and the then Managers of the  
 Asylum, and the Parish Council have nominated as his successor

Mr Richard Clark, their Chairman, whose appointment it is for the Board to confirm.

The Accounts and Report of the Charity Committee and of the Bevan Fund are herewith laid before the Corporation. Through the Charity Fund the boards of 36 patients in reduced circumstances have been supplemented during the past year, and through the operation of the Bevan Fund 35 patients of the better class have found accommodation among persons of their own rank in life, and amidst surroundings suitable to their position in society.

At Christmas last the Managers had the satisfaction of making further donations, amounting to £90, from the legacy of £500 bequeathed by the late Miss Millburgh Mowbray.

JOHN BOYD, *Chairman.*

# R E P O R T

OF THE

## CHARITY COMMITTEE OF MANAGERS

OF THE

### ROYAL EDINBURGH ASYLUM FOR THE INSANE.

YEAR ENDING 31ST DECEMBER 1895.

---

The Account of the Treasurer's Intronnissions with the Charity Fund is herewith submitted :—

The Fund amounted at 31st December to	. L.9926 10 6
The Ordinary Revenue received during the	. . .
year amounted to . . .	. L.400 17 7
Donation received from the Trus-	
tees of the late Mr David	
Nisbet, Architect, Edinburgh,	
in consideration of care and at-	
tention bestowed on a patient,	100 0 0
	-----
	L.500 17 7
The Ordinary Expenditure during	
the year for the benefit of	
patients was .	L.526 12 1
Expense of Manage-	
ment, . . .	12 14 2
	-----
	539 6 3
Excess of Expenditure over Income,	----- 38 8 8
Amount of Fund at 31st December 1895, .	. L.9888 1 10
	-----

Of the above sum of L.526, 12s. 1d. spent for the benefit of patients, L.90 was derived from the Legacy of L.500 (L.450 after

deduction of Government Duty) bequeathed by Miss Mowbray. As Miss Mowbray had coupled the Legacy with the condition that it should be spent and not capitalised, the Committee resolved to spread the expenditure of the money over five years. During the year eighteen patients have been relieved from this source, and the Legacy has now been reduced to L.360.

The total number of patients relieved during the year from the Ordinary Income of the Charity Fund was 37, and the number of patients on the roll at the close of the year was 30.

The Committee have great pleasure in acknowledging receipt of the above-mentioned Donation of L.100 by the Trustees of the late Mr David Nisbet.

Along with the Account of the Charity Fund, the Committee beg leave to submit the Account of the Treasurer's Intromissions with the Bevan Trust Fund. From the Account it will be seen that the income derived from invested funds during the year amounted to L.511, 12s. 6d., to which the balance of L.118, 7s. 11d., due to Revenue at the close of last Account, falls to be added, making a total of L.630, 0s. 5d., while the sum of L.482, 2s. 5d. was spent in supplementing the board of 35 patients.

The number of patients on the roll at the close of the year was 32.

JOHN M. M'CANDLISH,  
*Convener.*

PHYSICIAN-SUPERINTENDENT'S  
 A N N U A L R E P O R T  
 FOR THE YEAR 1895.

---

I HAVE the honour to submit the following Report of the Royal Edinburgh Asylum for the year 1895.

In the beginning of the year the number of patients was 882 (including 7 on probation) and on the 31st of December it was 884 (including 6 on probation).

General  
Statistics.

The admissions were 410, of whom 188 were men and 222 women.

The total number of patients under treatment was therefore 1292.

The discharges were 312, of whom 157 were men and 145 women.

The number of patients who died was 96, of whom 54 were men and 42 women.

The average number of patients resident during the year was 882, of whom 438 were men and 444 women.

#### ADMISSIONS.

The number of admissions (410) is seven more than the average of the past five years, but 44 less than last year. The private patients admitted were 102 in number, and the rate-paid 308. This is an increase of 22 admissions among the private patients and a decrease of 66 among the rate-paid as compared with last year. The average number of admissions of private

patients for the previous five years had been 91, and of the parochial patients 312. The most striking thing about the admissions is that 81 of them were into New Craig House, while the average year's admission rate into the old and now abandoned East House for the five years previously had been 42.6. If any proof were needed of the public requirements for such an institution as New Craig House, this extraordinary increase in the number of patients sent to it in its first year of opening would be sufficient.

Admissions of  
Higher Class  
Patients to New  
Craig House  
greatly in-  
creased.

I knew this to a certain extent previously from the demands in former years on our very restricted, and in many respects antiquated, accommodation at the East House, and the number of patients to whom I had to refuse admission for want of room. Already the total population at Craig House is mounting up so fast that in another year, with this same admission rate, its capacity will be about reached. Our number of recoveries there was also greater than they had ever been in the East House, and the "movement of population" there in fact during the year was far greater than we had ever had experience of among our higher class patients. It is these new admissions into an asylum that cause most work, anxiety, nursing and medical care; but, on the other hand, the results are most interesting and stimulating to exertion on their behalf. Perhaps the most gratifying feature of all was, that of the patients admitted into Craig House 12 came there voluntarily, this most admirable feature of our Scottish law for the treatment of mental diseases having never before been so largely taken advantage of here. Mental disease is the one complaint which its subjects commonly fail to recognise or to go to the doctor about. If they did so at a sufficiently early period I believe recoveries would take place more often and more thoroughly than they do. The moral and mental causes of the disease presented no very novel or striking features. They throw an instructive light on the already well known fact that it is not work but worry that kills; for we found that out of 89 cases in which the brain and mind had been upset by mental causes only 17 were from overwork, and all the rest, amounting to 80 per cent. of them, were from "mental worry," "domestic troubles," "sorrow," "shock," "adverse circumstances," "too solitary life,"

Largest number  
of voluntary  
patients.

Disease not early  
recognised or  
treated soon  
enough.

It is not work  
but worry that  
kills.

Influenza and  
its mental  
victims.

“adverse love affairs,” and “religious excitement.” Of the physical causes of the disease intemperance as usual heads the list with 87 cases. Influenza still claims its mental victims, for we had 15 cases from that cause. Forty-five cases had gross and palpable brain disease, such as paralysis and brain softening, on admission, and came here to be nursed and cared for during their inevitable progress towards death.

### DISCHARGES.

There were 170 recoveries, or a percentage of  $41\frac{1}{2}$  on the admissions, which is above the average.

### DEATHS.

There is nothing in the number or the causes of the deaths for the year that is unusual, or calls for special remark.

### GENERAL HISTORY OF THE INSTITUTION.

The moving of  
150 insane per-  
sons.

Though formally opened in 1894, Craig House was not actually occupied and used by patients till this year. The ladies were removed from the old East House on the 20th March, and the gentlemen on the 21st May. I am thankful to say the removal was effected without accident or serious inconvenience to the patients; but to the officials it was a time of anxiety and very hard work indeed, which some of them did not get over for months. We received encouragement, assistance, and forbearance, amidst necessary inconvenience, from the more sensible of the patients that was most gratifying. I am glad to say that the effect on the patients was without any exception either good or in no way injurious. In very many cases indeed they expressed their opinion in favour of the new house and the new arrangements in a very decided way, and well they might. Many patients who in no way admitted the necessity for their being here, yet admitted that the new house far exceeded the old in comfort, and were the better for this admission. Content has certainly been more common and more marked in this house than in the old, and it may well be so, for the space is greater,

Results of  
change good.

the cheerfulness of effect is far more marked, the beauty inside and out much more striking, the air is more bracing up on the hill, and the means of classification more perfect. The home life in the villas is much enjoyed, the magnificent views from the walks are appreciated, and the cheerfulness of the electric light is felt. It would have been discouraging beyond expression had all the thought and work and money expended on Craig House not borne fruit that could be seen and felt by the patients and by the staff. To myself, from the medical point of view, it is a satisfaction far more than I can adequately express to have at my command almost ideal conditions of treatment of my patients at Craig House. They are so to me at all events, even though they might not be so to others. For the various houses were planned, and all the arrangements were made in accord with my views of what would be best for the patients. All men work best with and take most satisfaction in their own tools. I have seen what seemed to me good hospitals for the insane of which the doctor did not approve, and things went with friction in consequence. I have seen bad buildings but which the doctor liked, and the patients were most comfortable in them. The treatment of mental disease and the restoration of the brain to mental health largely depend on a series of complicated conditions, and as yet we can only strive to make them in the main the most favourable that we can devise. The whole life of the patient in body and mind has to be conditioned. No more complicated problem exists in medicine than this. The right treatment of many bodily diseases is mere child's play as compared to it, for the patients are helping us with all their might, and the organ affected is simple in structure and working. In mental cases patients often do not help us at all, and the organ affected is the most delicate and complicated in nature. If New Craig House helps this problem on, it will leave humanity its debtor in a large degree.

Satisfaction of working with good tools.

Treatment of mental disease largely a favourable conditioning of the patient.

I must say, however, that when the East House was sold and I saw the builders begin to pull it down. A feeling of sadness came over me. It represented the philanthropic efforts of our fathers in favour of the insane. It was the first real Hospital and Home for the mentally affected in this great city.

Old East House sold.

Negotiations  
with the City  
Parish Council.

Its removal marks an era in our history. Negotiations are in progress between our Managers and the City Parish Council which I trust may end in some arrangement by which the crowding of our Rate-Paid Wards may be put an end to, and our difficulty in admitting all the poorer private patients who apply for admission be removed. Dr Bruce's treatment of certain cases by the use of thyroid extract has been extensively employed during the year, and has met with marked success in some cases. The use of other animal extracts is being systematically tried with some slight results that are, so far, promising. Dr Robertson is doing splendid original work of enduring importance in the Pathological Department.

A fourth Assistant Physician has been appointed, and we have been fortunate in securing the services of Dr J. M. Rutherford.

I am glad to be able to report well of the Staff generally.

To the Managers for their unvarying support and personal consideration I can scarcely find sufficiently appreciative words of thanks.

(Signed)

T. S. CLOUSTON, M.D.,

*Physician-Superintendent.*

\* With reference to the distinction between "predisposing" and "exciting" causes, it must be understood that no single cause is enumerated as both predisposing and exciting in the case of any individual patient.

† The figures in the Total column represent the entire number of instances in which the several causes (either alone or in combination with others) were stated to have produced the mental disorder. The excess of the aggregate of such causes over the number of patients admitted is owing to combinations of causes.

REPORTS  
OF THE  
COMMISSIONERS IN LUNACY.

ROYAL EDINBURGH ASYLUM,  
*9th, 10th, and 11th October 1895.*

THERE are 891 certificated patients on the register of the Asylum at this date. Of these 186 men and 182 women are private patients, and 244 men and 279 women are paupers. There are two gentlemen and five ladies absent on probation, and one lady absent on pass; so that there are 883 certificated patients resident. In addition to these there are five gentlemen and four ladies who are voluntary inmates, making in all a total of 892 persons resident. Since last visit one male and one female have been transferred from the private to the pauper list, and five males and five females from the pauper to the private list.

The following statement shows the changes which have taken place in the population since the date of last visit :—

		Private Patients.		Pauper Patients.		Totals.
		M.	F.	M.	F.	
Certificated Patients	{ Admitted .....	23	39	92	121	275
	{ Discharged recovered...	14	13	39	45	111
	{ Discharged unrecovered.	6	8	34	37	85
	{ Died .....	9	7	27	16	59
Voluntary Inmates	{ Admitted .....	4	3	0	0	7
	{ Left .....	4	1	0	0	5

The deaths are registered as due to brain disease in 24 cases, to lung diseases in seven cases, to heart disease in seven cases, to tubercular diseases, including phthisis pulmonalis, in 11 cases, to

senile decay in five cases, to intestinal disease in two cases, and to kidney disease, cancer and variola in one case each. In the cases of 40 of the 59 patients who died, a *post mortem* examination was made, and the results of these examinations are recorded with fulness and scientific accuracy. Pathological research continues to be an important feature in the scientific work carried on in the institution.

The Register of Restraint and Seclusion contains 140 entries referring to the use of restraint in the treatment of one patient, and to the use of seclusion in the treatment of eight patients. Three accidents are recorded, one of which was an attempt at suicide by swallowing disinfecting powder, and the other two, involving fracture of bones, were due to falls. There have been 14 escapes in which the patients were absent overnight before being brought back.

The changes in the staff consist in the engagement of 71 attendants and servants, the dismissal of five, and the resignation of 43.

An important event in the history of the institution has taken place since last visit in the completion and occupation of Craig House. The lady patients were transferred to it on the 20th March 1895, and the gentlemen on the 20th May. Externally this building is imposing and attractive, and internally it may be said to be a masterpiece in design as an asylum for the upper and middle classes. All its arrangements have been planned with great care and ability, and it is pleasing to observe how every detail has been designed with a view to the efficient care of the inmates and the successful administration of the institution. To the south of the central hall, which is large, lofty and richly decorated, are the drawing-room and the billiard-room, and to the north are the five dining-rooms. The buildings, which run east and west and have wings to the south, consist of three storeys; the first and second contain four wards, and the third consists of bedrooms. To the west of Craig House are the hospital for gentlemen and a villa called Queen's Craig; these are connected so as to have billiard and other rooms in common. To the east is the hospital for ladies. The whole of the buildings are lighted by the electric light. The heating arrangements con-

sist of open fires and hot water pipes. The sanitary arrangements are of the most recent and efficient kind. The furniture and furnishings throughout all these buildings are handsome and elegant, and the decoration is rich and in excellent taste. Nothing has been left undone which would secure the comfort, safety, and well-being of the patients. Such pleasant and cheerful surroundings as exist in Craig House and the adjacent villas cannot fail to have a most beneficial influence on the mental and bodily condition of the patients, and to make their life as happy as it is possible to be during their mental illness. The prediction made in a former entry that when Craig House and the adjacent villas were completed Scotland would possess an asylum for high-class patients which would not have its equal anywhere, has, it will be readily acknowledged, been fulfilled.

The population of the Institution is at present distributed among its sections in the following manner:—

	Private Patients.		Pauper Patients.		Totals.
	M.	F.	M.	F.	
West House.....	102	84	244	275	705
Myreside.....	6	0	0	0	6
Craig House.....	51	52	0	0	103
Old Craig House.....	7	4	0	0	11
South Craig.....	0	17	0	0	17
Bevan House.....	0	14	0	0	14
Ladies' Hospital.....	0	7	0	0	7
Gentlemen's Hospital....	9	0	0	0	9
Queen's Craig.....	9	0	0	0	9
Seaside Villa, Cockenzie	3	4	2	2	11

The possession of these separate buildings affords means for classifying the patients according to their social and mental condition, and it also affords facilities for conferring benefits and privileges upon them suitable to their mental condition.

The wards in every section of the Asylum were found in excellent order, scrupulously clean and well ventilated, and the condition of the patients was most satisfactory. The case of each patient is made a matter of special study, and the case books show that everything is done which medical science indicates in order to promote recovery. The nursing of the sick and infirm in the hospital sections is of a high standard of efficiency.

The patients generally bore every evidence of being well cared for, and no efforts are spared to secure that they should be kindly and considerately treated. Their food, exercise, and occupations receive every attention. The efficient condition of the Institution shows that it is managed by Dr Clouston with great energy and ability. It is understood with satisfaction that the increase in the revenue of the institution indicates financial prosperity.

The books and registers were examined, and found regularly and correctly kept.

JOHN FRASER,

*Commissioner in Lunacy.*

---

ROYAL EDINBURGH ASYLUM,  
3rd, 4th, and 5th February 1896.

THERE are 894 patients on the Registers of the Asylum. Of these there are under certificates 185 male and 180 female private patients, and 241 male and 276 female pauper patients. Eight gentlemen and four ladies are voluntary inmates. All the above are resident in the Asylum except two male and five female private patients, who are absent on statutory probation.

The following changes have taken place among the certificated patients between 9th October 1895, the date to which the figures in the preceding entry refer, and 3rd February, the first day of the present visit.

	Private Patients.		Pauper Patients.		Totals.
	M.	F.	M.	F.	
Admitted.....	14	14	49	43	120
Discharged recovered.....	5	5	14	22	46
Discharged unrecovered.....	4	2	26	20	52
Dead.....	6	8	12	5	31

During the same period five gentlemen have been admitted as voluntary inmates, and two gentlemen who were voluntary inmates have been discharged. There have also been two male and two female patients transferred from the private to the

pauper list, and two male and one female transferred from the pauper to the private list.

The deaths are registered as due in fourteen cases to diseases of the nervous centres, in seven cases to diseases of the heart and lungs, in six cases to diseases of other viscera, and in one case each to pyæmia, influenza, and exhaustion from melancholia. One death was due to suicide by strangulation. *Post-mortem* examinations were made in 20 cases.

The Register of Restraint and Seclusion contains 72 entries. They refer to the use of mechanical restraint in the treatment of one patient, and to the use of seclusion in the treatment of five patients. There have been four cases of bodily injury to patients. Two were self-inflicted wounds of the throat, and one was a self-inflicted injury to the scalp. One was a fracture of the ulna which occurred during a struggle of a patient with an attendant, and one was the case of suicidal strangulation already mentioned. The fracture of the ulna led to the dismissal of the attendant with whom the struggle took place. The suicide occurred in the case of a patient who was not suspected of any suicidal tendency, and no blame was attached to those in charge. There have been two cases of escape in which the patients were absent overnight before being brought back.

The Asylum was found in excellent order throughout, and the requirements of the patients are well provided for in every department of the institution.

In the sections of the Asylum devoted to pauper patients and private patients at the lowest rates of board, the patients were found clean in person, suitably clothed, and bearing evidence of being judiciously and kindly treated. There is, however, a larger number of patients in these sections than they can satisfactorily accommodate. It is, therefore, understood with strong approval that the Managers have entered on negotiations having for their object the removal of a considerable number of the pauper inmates. This step has not been taken too soon, for the overcrowding is certain before long to be much greater than it is at present, and it already interferes seriously with the efficiency of the Asylum. It is hoped, therefore, that the negotiations may have a successful issue at an early date.

It is understood also with approval that an addition of some single rooms is proposed to be made to the pauper accommodation. It has been recognised for some time that an addition of this kind is much to be desired, and it should be made as soon as possible.

The administration of New Craig House and its villa dependencies is now in full operation, and the old East House, which had so long been the department of the Asylum appropriated to the higher class of private patients, has ceased to belong to the institution. The benefit conferred on the patients by their transference to the new buildings was expected to be great, and the expectation has been fully realised. The comfortable character and the elegance of the accommodation provided, and the facilities afforded for efficient administration, have been sufficiently commented on in previous entries. There are, however, aspects of the effect of the new surroundings on the condition of the patients which only come fully into view in actual experience. One of these which attracted attention during the visit was that life in the new buildings is more interesting than in those which have been relinquished. This has in itself a remedial influence, and an impression was produced by the appearance and manner of many of the patients that it has had the effect of wakening up their mental faculties to more active and more healthy exercise. It may be added that the general impression produced by the visit to the new buildings was most satisfactory.

The purely medical work of the Asylum is of a high order. The eminent professional position of Dr Clouston is recognised everywhere, and he is assisted now, as he has always been, by a medical staff of distinguished ability. The Case Books show, in the most satisfactory manner, the care with which the condition of every patient is studied, and the attention which is bestowed on every detail of treatment. The work of the Pathological Department of the institution also deserves to be mentioned with commendation. The investigation of the changes in the structure of the brain which are associated with insanity has during recent years made very substantial progress, and this has enabled physicians to understand more clearly the nature of the mental disorders with which they have to deal. The asylum physician

who neglects the study of these changes must therefore be regarded as imperfectly equipped for his work. In view of this, it is gratifying to see that the pathological work of the Asylum receives great attention, and is carried on with much ability and success.

The resident staff of the Asylum consists of 238 persons, or more than 1 to every 4 patients. The following statement shows the proportion of the two sexes :—

	M.	F.	T.
Attendants and nurses .....	71	78	149
Other resident officials.....	39	50	89
	<hr/> 110	<hr/> 128	<hr/> 238

Sixty attendants and nurses are employed in the care of pauper patients and patients at similar rates of board—an average of 1 to every 8·6 patients. Eighty-nine are employed in the case of private patients at higher rates of board—an average of 1 to every 4·2 patients. Six male and six female attendants are engaged in night duty.

The books and registers were examined and were found regularly and correctly kept.

JOHN SIBBALD,

*Commissioner in Lunacy.*

The following attendants have passed the examination held on 6th May 1895, for the Nursing Certificate granted by the Medico-Psychological Association.

EDINBURGH, 9th May 1896.—I have examined the foregoing Account Charge and Discharge of the Intromissions of the Treasurer of the Royal Edinburgh Asylum for the Insane for the year from 31st December 1894 to 31st December 1895, together with the Appendices relative thereto, and in connection with the Books of the House Steward and Matrons, and I now beg to report that I have found them to be correctly stated, and sufficiently vouched and instructed.

I have not, however, checked the apportionments between the Craig House and the West House.

(Signed) JOHN M. HOWDEN, C.A.

ABSTRACT of ORDINARY and EXTRAORDINARY RECEIPTS and PAYMENTS  
of NEW CRAIG HOUSE (including OLD CRAIG HOUSE, SOUTH CRAIG,
